Professional Summary

I am currently pursuing a degree in Informatics at the Syrian Virtual University, where I am developing a strong foundation in computer science and software engineering. In parallel with my academic studies, I am enrolled in the Byte4Future program, where I am specializing in the MERN stack (MongoDB, Express.js, React, Node.js). This hands-on training is enhancing my practical skills in Full-Stack web development and preparing me for real-world software projects. I am passionate about technology, problem-solving, and continuously learning to stay updated with the latest trends in the software industry.

Education

Bachelor's in Information Technology Engineering
Syrian Virtual University (2021–Present)

Trainings

Full-Stack Developer Trainee | Bytes4Future Program – Aga Khan Foundation | 2025 ○ Completed a 5-month intensive MERN stack training, building scalable web apps with MongoDB, Express.js, React, and Node.js.

- Developed capstone projects simulating real-world business cases, focusing on security, responsiveness, and performance.
- Recognized with a certificate of completion for mastering technical and professional skills.

Projects

AI-Powered CV Generator (MERN Stack) ○ Developed a full-stack platform that generates ATS optimized, professional resumes using AI, with real-time scoring and PDF export.

- Tech: React, Node.js, Express, MongoDB, Tailwind CSS

Real-Time Chat Application ○ Built a scalable messaging app using Socket.io for instant communication, with a responsive UI.

- Tech: React, Node.js, Express, MongoDB, Socket.io

FairShare: Smart Food Distribution System (Hackathon Winner – 1st Place) ○ Designed an AI driven platform to track and distribute food donations efficiently, prioritizing families based on real-time needs.

- Delivered core features (inventory management, donor/recipient portals, AI allocation) in 24 hours during a hackathon
- Tech: MERN Stack, JWT, AI algorithms, Socket.io,

Spotify Listening History Musicify ○ Designed a dynamic dashboard for tracking user listening habits, with data visualization and real-time insights.

- Tech: React, Tailwind CSS

Languages

Arabic (Native) | English (Intermediate)

Achievements

- 🏆 1st Place in a hackathon for the FairShare System.
- 🏆 Delivered 5+ full-stack projects with optimized performance and clean architecture.
- 🏆 Practiced agile methodologies in team-based commercial projects.

Skills

- ✓ **Back-End:** Node.js, Express.js, MongoDB, RESTful APIs, JWT, Socket.io,(Basic)
 - ✓ **Front-End:** React.js, HTML/CSS, JavaScript, Tailwind CSS
 - ✓ **Tools & Practices:** Git, Figma (Basic), MVC Architecture, Agile/Scrum
 - ✓ **Soft Skills:** Problem-Solving, Project Management, Team Collaboration, Critical Thinking
-
